SURFACE SCIENCE

A journal devoted to the physics and chemistry of interfaces

Founding Editor: Harry C. Gatos

Editor

Dr. Charles B. Duke, Xerox Webster Research Center, 800 Phillips Road, Bldg. 0114-38D, Webster, NY 14580, USA
Telefax: +1-716-265-5080; Electronic mail: surface.science@crt.xerox.com

Associate Editor

Dr. Joel Kubby, Xerox Webster Research Center, 800 Phillips Road, Bldg. 0114-38D, Webster, NY 14580, USA
Telefax: +1-716-265-5080; Electronic mail: surface.science@crt.xerox.com

Aims and Scope

Surface Science deals exclusively with fundamental theoretical and experimental studies in the physics and chemistry of surfaces. It covers topics contributing to a better understanding of basic phenomena occurring on surfaces; the word "surface" being interpreted to include free surfaces as well as interfaces generally. A special feature of the journal is the periodic inclusion of proceedings of symposia and conferences on aspects relevant to the study of the physics and chemistry of interfaces.

Abstracted/indexed in:

Aluminium Industry Abstracts; Chemical Abstracts; Current Contents: Physical, Chemical and Earth Sciences; EI Compendex Plus; INSPEC; Metals Abstracts.

Subscription Information 1998

Volumes 392–417 of Surface Science (ISSN 0039-6028) are scheduled for publication. (Frequency: three times per month.) Prices are available from the publishers upon request. A combined subscription to Surface Science volumes 392–417, Applied Surface Science volumes 119–133, and Surface Science Reports volumes 30–32 is available at a reduced rate.

Subscriptions are accepted on a prepaid basis only. Issues are sent by SAL (Surface Air Lifted) mail wherever this service is available. Airmail rates are available upon request.

Orders, claims, and product enquiries: please contact the Customer Support Department at the regional Sales Office nearest to you:

New York: Elsevier Science, P.O. Box 945, New York, NY 10159-0945, USA. Tel.: (+1) 212-633-3730 [Toll Free number for North American customers: 1-888-4ES-INFO (437-4636)]; fax: (+1) 212-633-3680; e-mail: usinfo-f@elsevier.com

Amsterdam: Elsevier Science, P.O. Box 211, 1000 AE Amsterdam, The Netherlands. Tel.: (+31) 20-485-3757; fax: (+31) 20-485-3432; e-mail: nlinfo-f@elsevier.nl

Tokyo: Elsevier Science, 9–15, Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan. Tel.: (+81) 3-5561-5033; fax: (+81) 3-5561-5047; e-mail: info@elsevier.co.jp

Singapore: Elsevier Science, No. 1 Temasek Avenue, #17-01 Millenia Tower, Singapore 039192. Tel.: (+65) 434-3727; fax: (+65) 337-2230; e-mail: asiainfo@elsevier.com.sg

Rio de Janeiro: Elsevier Science, Rua Sete de Setembro 111/16 Andar, 20050-002 Centro, Rio de Janeiro-RJ, Brazil. Tel.: (+55) (21) 509 5340; fax: (+55) (21) 507 1991; e-mail: elsevier@campus.com.br [Note (Latin America): for orders, claims and helpdesk information, please contact the Regional Sales Office in New York as listed above]

Claims for issues not received should be made within six months of our publication (mailing) date.

Advertising Information

Advertising orders and inquiries can be sent to: *Europe and ROW:* Rachel Gresle-Farthing, Elsevier Science Ltd., Advertising Department, The Boulevard, Langford Lane, Kidlington, Oxford, OX5 1GB, UK. Tel.: (+44) 1865 843565; fax: (+44) 1865 843976; e-mail: r.gresle-farthing@elsevier.co.uk. *USA and Canada:* Elsevier Science Inc., Mr Tino DeCarlo, 655 Avenue of the Americas, New York, NY 10010-5107, USA. Tel.: (212) 6333815; fax: (212) 6333820; e-mail: t.decarlo@elsevier.com. *Japan:* Elsevier Science Japan, Advertising Department, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan. Tel.: (3) 5561-5033; fax: (3) 5561-5047.

US Mailing notice – Surface Science (ISSN 0039-6028) is published three times per month by Elsevier Science B.V., Molenwerf 1, P.O. Box 211, 1000 AE Amsterdam, The Netherlands. Annual subscription price in the USA is US$ 9310 (valid in North, Central and South America only), including air speed delivery. Periodicals postage paid at Jamaica, NY 11431.
USA Postmasters: Send changes to Surface Science, Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Airfreight and mailing in the USA by Publications Expediting.

♾ The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper).

This journal and the individual contributions contained in it are protected under copyright by Elsevier Science B.V., and the following terms and conditions apply to their use:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws.

Permission of the Publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier Science Rights & Permissions Department, PO Box 800, Oxford OX5 1DX, UK; phone: (+44) 1865 843830, fax: (+44) 1865 853333, e-mail: permissions@elsevier.co.uk. You may also contact Rights & Permissions directly through Elsevier's home page (http://www.elsevier.nl), selecting first 'Customer support', then 'General Information', then 'Permissions Query Form'. In the USA, users may clear permissions and make payments through the Copyright Clearing Centre, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone (978) 7508400, fax: (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (171) 4365931, fax: (171) 4363986. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution.

Permission of the Publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the Publisher is required to store or use electronically any material contained in this journal, including any article or part of an article. Contact the Publisher at the address indicated.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the Publisher.

Address permissions requests to: Elsevier Science Rights & Permissions Department, at the mail, fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality of such product or of the claims made of it by its manufacturer.

Instructions for Authors Concerning the Use of Keywords for Indexing in Surface Science

Given below is a listing of keywords for the Subject and Materials Indexes used by Surface Science. The Subject index is divided into three classes: Theoretical Methods, Experimental Methods, and Phenomena. Please indicate below your abstract at least one keyword from as many of the three classes as appropriate to describe the contents of your manuscript. (You may also tick the appropriate box and include this list with your manuscript.) Occasionally it will not be possible to include a keyword from all three classes, e.g., a general theory manuscript will not exhibit a keyword from the Experimental Methods class. In such a case, omit the entry from the inapplicable class. Also, if appropriate, please select a keyword from one of the three classes of the Materials Index, i.e., Elemental and Chemical Identity, Physical State, and Electrical and Magnetic Behavior. You may use multiple keywords in the above mentioned six classes up to a maximum of eight in total. For example, many experimental papers will be characterized by more than one keyword in the Experimental Methods class of the Subject Index as well as by several keywords from the Materials Index. The keywords will be used as labels for the use in electronic navigation tools. Thus, careful attention to giving a correct, useful description of your work will generate more thorough use of your paper once it is published.

version of 1 October 1996

Subject index

Theoretical methods, models and techniques

- ☐ Ab initio quantum chemical methods and calculations
- ☐ Atom–solid interactions, scattering, diffraction
- ☐ Atomistic dynamics
- ☐ Computer simulations
- ☐ Construction and use of effective interatomic interactions
- ☐ Density functional calculations
- ☐ Electron density, excitation spectra calculations
- ☐ Electron–solid interactions, scattering, diffraction
- ☐ Equilibrium thermodynamics and statistical mechanics
- ☐ Green's function methods
- ☐ Ion–solid interactions, scattering, channeling
- ☐ Ising models
- ☐ Jellium models
- ☐ Many body and quasi-particle theories
- ☐ Models of non-equilibrium phenomena
- ☐ Models of non-linear phenomena
- ☐ Models of surface chemical reactions
- ☐ Models of surface kinetics
- ☐ Molecular dynamics
- ☐ Non-equilibrium thermodynamics and statistical mechanics
- ☐ Semi-empirical models and model calculations

Experimental sample preparation and characterization methods

- ☐ Adsorption isotherms
- ☐ Appearance potential spectroscopy
- ☐ Atom–solid reactions
- ☐ Atom–solid scattering and diffraction – elastic
- ☐ Atom–solid scattering and diffraction – inelastic
- ☐ Atomic force microscopy
- ☐ Auger electron spectroscopy
- ☐ Chemical vapor deposition
- ☐ Desorption induced by electronic transitions (DIET)
  - ☐ *Angle resolved DIET* (including electron stimulated desorption ion angular distribution (ESDIAD))
  - ☐ *Electron stimulated desorption (ESD)*
  - ☐ *Photon stimulated desorption (PSD)*
  - ☐ *Surface photochemistry*
- ☐ Electrical transport measurements
- ☐ Electrochemical methods
- ☐ Electron emission measurements
  - ☐ *Exoelectron emission*
  - ☐ *Field emission*
  - ☐ *Photoemission (total yield)*
  - ☐ *Secondary electron emission*
  - ☐ *Thermally-stimulated emission*
- ☐ Electron energy loss spectroscopy
- ☐ Electron microscopy
  - ☐ *Ballistic electron emission microscopy (BEEM)*
  - ☐ *Low-energy electron microscopy (LEEM)*
  - ☐ *Reflection electron microscopy (REM)*
  - ☐ *Scanning electron microscopy (SEM)*
  - ☐ *Scanning transmission electron microscopy (STEM)*
- ☐ Electron–solid diffraction
  - ☐ *Auger electron diffraction*
  - ☐ *Low energy electron diffraction (LEED)*
  - ☐ *Photoelectron diffraction*
  - ☐ *Photoelectron holography*
  - ☐ *Reflection high-energy electron diffraction (RHEED)*
  - ☐ *Transmission high-energy electron diffraction*
- ☐ Electron–solid scattering and transmission – elastic
- ☐ Electron–solid scattering and transmission – inelastic
- ☐ Electron spin resonance
- ☐ Ellipsometry
- ☐ Field emission microscopy
- ☐ Field emission spectroscopy
- ☐ Field ion microscopy
- ☐ Inverse photoemission spectroscopy
- ☐ Ion etching

- ☐ Ion implantation
- ☐ Ion scattering spectroscopy
  - ☐ *High energy ion scattering (HEIS)*
  - ☐ *Low energy ion scattering (LEIS)*
  - ☐ *Medium energy ion scattering (MEIS)*
- ☐ Isotopic exchange/traces
- ☐ Laser methods
  - ☐ *Laser annealing*
  - ☐ *Laser induced thermal desorption (LITD)*
  - ☐ *Resonance enhanced multiphoton ionization mass spectroscopy (REMPI/MS)*
- ☐ Liquid phase epitaxy
- ☐ Magnetic measurements
- ☐ Molecular beam epitaxy
- ☐ Molecule–solid reactions
- ☐ Molecule–solid scattering and diffraction – elastic
- ☐ Molecule–solid scattering and diffraction – inelastic
- ☐ Mössbauer spectroscopy
- ☐ Neutron scattering
- ☐ Non-linear optical methods
  - ☐ *Second harmonic generation*
  - ☐ *Sum frequency generation*
- ☐ Nuclear magnetic resonance
- ☐ Nuclear reaction analysis
- ☐ Photoelectron spectroscopy
  - ☐ *Angle resolved photoemission*
  - ☐ *Visible and ultraviolet photoelectron spectroscopy*
  - ☐ *Soft X-ray photoelectron spectroscopy*
  - ☐ *X-ray photoelectron spectroscopy*
  - ☐ *Synchrotron radiation photoelectron spectroscopy*
- ☐ Photon absorption spectroscopy
  - ☐ *Extended X-ray absorption fine structure (EXAFS)*
  - ☐ *Infrared absorption spectroscopy*
  - ☐ *Near edge extended X-ray absorption fine structure (NEXAFS)*
  - ☐ *Photoacoustic spectroscopy*
  - ☐ *Visible/ultraviolet absorption spectroscopy*
  - ☐ *Surface extended X-ray absorption fine structure (SEXAFS)*
  - ☐ *X-ray absorption spectroscopy*
- ☐ Photon stimulated desorption (non-electronic)
- ☐ Plasma processing
- ☐ Positron spectroscopy
- ☐ Radioactive tracer methods
- ☐ Raman scattering spectroscopy
- ☐ Reflection spectroscopy
- ☐ Scanning tunneling microscopy
- ☐ Scanning tunneling spectroscopies
- ☐ Secondary ion mass spectroscopy
- ☐ Solid phase epitaxy
- ☐ Sputter deposition
- ☐ Surface photovoltage spectroscopy
- ☐ Thermal desorption spectroscopy
- ☐ Work function measurements
- ☐ X-ray emission
- ☐ X-ray scattering, diffraction, and reflection

Phenomena

- ☐ Adhesion
- ☐ Adsorption kinetics
- ☐ Atom emission
- ☐ Atom–solid interactions
- ☐ Auger ejection
- ☐ Bending of surfaces
- ☐ Catalysis
- ☐ Chemisorption
- ☐ Compound formation
- ☐ Conductivity
- ☐ Corrosion
- ☐ Crystallization
- ☐ Dielectric phenomena
- ☐ Diffusion and migration
- ☐ Electrical transport (conductivity, resistivity, mobility, etc.)
- ☐ Electron bombardment
- ☐ Electron emission
- ☐ Electron–solid interactions
- ☐ Electron stimulated desorption
- ☐ Energy dissipation
- ☐ Epitaxy
- ☐ Etching
- ☐ Evaporation and sublimation
- ☐ Faceting
- ☐ Field effect
- ☐ Field emission
- ☐ Field evaporation
- ☐ Field ionization
- ☐ Friction
- ☐ Growth
- ☐ Hall effect
- ☐ Interface states
- ☐ Ion bombardment
- ☐ Ion emission
- ☐ Ion implantation
- ☐ Ion–solid interactions
- ☐ Light scattering
- ☐ Lubrication
- ☐ Luminescence
  - ☐ *Atom/ion stimulated luminescence*
  - ☐ *Chemiluminescence*
  - ☐ *Electroluminescence*
  - ☐ *Photoluminescence*
- ☐ Magnetic phenomena (cyclotron resonance, phase transitions, etc.)
- ☐ Nucleation
- ☐ Oxidation
- ☐ Photochemistry
- ☐ Photoconductivity
- ☐ Photoelectron diffraction
- ☐ Photoelectron emission
- ☐ Photon emission
- ☐ Photon stimulated desorption
- ☐ Physical adsorption
- ☐ Piezoelectric effect
- ☐ Positron–solid interactions
- ☐ Quantum effects
- ☐ Radiation damage
- ☐ Second harmonic generation
- ☐ Secondary electron emission
- ☐ Self-assembly
- ☐ Sintering
- ☐ Sputtering
- ☐ Sticking
- ☐ Superconductivity
- ☐ Surface chemical reaction
- ☐ Surface diffusion
- ☐ Surface electrical transport (surface conductivity, surface recombination, etc.)
- ☐ Surface electronic phenomena (work function, surface potential, surface states, etc.)
- ☐ Surface energy
- ☐ Surface melting
- ☐ Surface photovoltage
- ☐ Surface relaxation and reconstruction
- ☐ Surface roughening
- ☐ Surface segregation
- ☐ Surface stress
- ☐ Surface structure, morphology, roughness, and topography
- ☐ Surface tension
- ☐ Surface thermodynamics (including phase transitions)
- ☐ Surface waves
  - ☐ *Acoustic waves*
  - ☐ *Capillary waves*
  - ☐ *Magnons*
  - ☐ *Phonons*
  - ☐ *Plasmons*
  - ☐ *Polaritons*
- ☐ Thermal desorption
- ☐ Thermionic emission
- ☐ Tribology
- ☐ Tunneling
- ☐ Vibrations of adsorbed molecules
- ☐ Wetting

Materials index

ELEMENTAL AND CHEMICAL IDENTITY
(Include each component of an interface or multilayer structure as a separate category. Add your own specific elemental or chemical label if a suitable entry is not on the list.)

Elements

- ☐ Alkali metals
- ☐ Alkaline earth metals
- ☐ Aluminum
- ☐ Antimony
- ☐ Arsenic
- ☐ Bismuth
- ☐ Boron
- ☐ Bromine
- ☐ Cadmium
- ☐ Carbon
- ☐ Cerium
- ☐ Chalcogens
- ☐ Chlorine
- ☐ Chromium
- ☐ Cobalt
- ☐ Copper
- ☐ Diamond
- ☐ Gallium
- ☐ Germanium
- ☐ Gold
- ☐ Graphite
- ☐ Hafnium
- ☐ Hydrogen
- ☐ Indium
- ☐ Iodine
- ☐ Iridium
- ☐ Iron
- ☐ Lanthanides
- ☐ Lead
- ☐ Manganese
- ☐ Mercury
- ☐ Molybdenum
- ☐ Nickel
- ☐ Niobium
- ☐ Nitrogen
- ☐ Noble gases
- ☐ Osmium
- ☐ Palladium
- ☐ Phosphorus
- ☐ Platinum
- ☐ Rhenium
- ☐ Rhodium
- ☐ Ruthenium
- ☐ Scandium
- ☐ Silicon
- ☐ Silver
- ☐ Tantalum
- ☐ Technetium
- ☐ Thallium
- ☐ Thorium
- ☐ Tin
- ☐ Titanium
- ☐ Tungsten
- ☐ Uranium
- ☐ Vanadium
- ☐ Ytterbium
- ☐ Yttrium
- ☐ Zinc
- ☐ Zirconium
- ☐ Other .....*

Compounds (non-molecular solids)

- ☐ Alkali halides
- ☐ Alloys
- ☐ Aluminum oxide
- ☐ Barium oxide
- ☐ Biological compounds
- ☐ Borides
- ☐ Boron nitride
- ☐ Cadmium selenide
- ☐ Cadmium sulphide
- ☐ Cadmium telluride
- ☐ Carbides
- ☐ Cobalt oxides
- ☐ Copper oxides
- ☐ Gallium antimonide
- ☐ Gallium arsenide
- ☐ Gallium nitride
- ☐ Gallium phosphide
- ☐ Gallium selenide
- ☐ Halides
- ☐ Hydrides
- ☐ Indium antimonide
- ☐ Indium arsenide
- ☐ Indium oxides
- ☐ Indium phosphide
- ☐ Inorganic compounds
- ☐ Iron oxide
- ☐ Lead telluride
- ☐ Magnesium oxides
- ☐ Mercury telluride
- ☐ Mica
- ☐ Molybdenum oxides
- ☐ Nickel carbide
- ☐ Nickel oxides
- ☐ Nickel sulphide
- ☐ Nitrides
- ☐ Silicides
- ☐ Silicon carbide
- ☐ Silicon–germanium
- ☐ Silicon nitride
- ☐ Silicon oxides
- ☐ Steel
- ☐ Sulphides
- ☐ Tin oxides
- ☐ Tin telluride
- ☐ Titanium carbide
- ☐ Titanium oxide
- ☐ Tungsten oxide
- ☐ Uranium oxide
- ☐ Vanadium oxide
- ☐ Zeolites
- ☐ Zinc oxide
- ☐ Zinc selenide
- ☐ Other .....*

Molecules

- ☐ Alcohols
- ☐ Aldehydes
- ☐ Alkanes
- ☐ Alkenes
- ☐ Alkynes
- ☐ Ammonia
- ☐ Aromatics
- ☐ Biological molecules – nucleic acids
- ☐ Biological molecules – proteins
- ☐ Biological molecules – other .....*

*Please, fill in necessary new Materials Index Keyword. If the new keyword is indicated on the manuscript, please, make clear to which subcategory it belongs.

Bringing you the latest reviews in surface science

Surface Science Reports

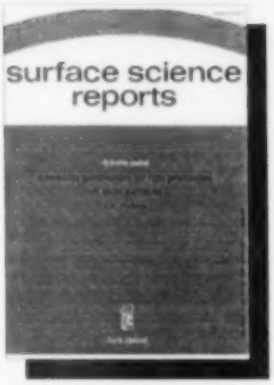
A Review Journal

General Editor:

W.H. Weinberg, *University of California, Santa Barbara, CA, USA*

Editors:

D.J. Auerbach, V. Bortolani, J.E. Demuth, L. Dobrzynski, C.B. Duke, G. Ertl, L.C. Feldman, D.A. King, T.E. Madey, W. Mönch, Y. Murata, O. Nishikawa, J.K. Nørskov, J.E. Rowe, P.A. Thiel, G. Thornton,



The journal contains **invited** review papers on the properties of surfaces and interfaces of metals, semiconductors and insulators. The emphasis is on fundamental aspects of solid and liquid interfaces, their atomic and electronic structure. Both theoretical and experimental papers are included.

Surface Science Reports is indexed/abstracted in: Aluminium Industry Abstracts (ASM International – Materials Information), Chemical Abstracts, Current Contents: Physical, Chemical and Earth Sciences, EI Compendex Plus, Engineered Materials Abstracts (ASM International – Materials Information), INSPEC, Metals Abstracts (ASM International – Materials Information), Wilson Applied Science and Technology Abstracts.

CONTENTS-Alert: Surfaces, Interfaces and Thin Films. This is a FREE current awareness service which delivers through e-mail the tables of contents of the journals in the **Surfaces and Interfaces Publication Program**. Not only will you receive the tables of contents before or upon publication of the journal, but you can also browse through these tables of contents at your own terminal. Subscribe to the FREE service by sending an e-mail to: **c-alert.surfsci@elsevier.nl**

Subscription Information:

SURFACE SCIENCE

A journal devoted to the physics and chemistry of interfaces

Instructions to Authors (short version)

The full "Instructions to Authors" can be found on the World Wide Web at http://www.elsevier.nl/locate/surfaces.

Submission of papers

Manuscripts (one original + two copies) should be sent, depending on the country of origin, to the editor or one of the regional editors as follows:

> Dr. Charles B. Duke (editor):
> manuscripts from North and South America, Asia (except Japan), Australia and New Zealand and Surface Science Letters from *all* countries
> Dr. Richard M. Lambert: Europe apart from Germany and Austria, Africa
> Prof. Yoshitada Murata: Japan
> Prof. Klaus Wandelt: Germany and Austria
>
> **(for addresses see inside front cover)**

Original material. Submission of a manuscript implies it is not being simultaneously considered for publication elsewhere and that the authors have obtained the necessary authority for publication.

Refereeing. Authors are encouraged to list the names (addresses and telephone numbers) of three to four individuals who are qualified to serve as referees for their paper. The referees selected will not necessarily be from the list suggested by the author.

Manuscript preparation

All manuscripts should be written in good English. The paper copies of the text should be prepared with double line spacing and wide margins, on numbered sheets.

Structure. Please adhere to the following order of presentation: Article title, Author(s), Affiliation(s), Abstract, Keywords, Main text, Acknowledgements, Appendices, References, Figure captions, Tables.

Corresponding author. The name, complete postal address, telephone and fax numbers and the e-mail address of the corresponding author should be given on the first page of the manuscript.

Keywords. Authors are requested to supply a maximum of eight keywords from the keyword list, published in the last issue of every volume. Detailed instructions are given above the keyword list itself.

References. References to other work should be consecutively numbered in the text using square brackets and listed by number in the Reference list. Please refer to the more detailed instructions for examples.

Illustrations

Illustrations should also be submitted in triplicate: one master set and two sets of copies. The *line drawings* in the master set should be original laser printer or plotter output or drawn in black india ink, with careful lettering, large enough (3–5 mm) to remain legible after reduction for printing. *Photographs* should be originals, with somewhat more contrast than is required in the printed version. They should be unmounted unless part of a composite figure. Any scale markers should be inserted on the photograph itself, not drawn below it.

Colour plates. Figures may be published in colour, if this is judged essential by the editor. The publisher and the author will each bear part of the extra costs involved. Further information is available from the publisher.

After acceptance

Notification. You will be notified by the editor of the journal of the acceptance of your article and invited to supply an electronic version of the accepted text, if this is not already available.

Copyright transfer. In the course of the production process you will be asked to transfer the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Page proofs. When page proofs are made and sent out to authors, this is in order to check that no undetected errors have arisen in the typesetting (or file conversion) process. No changes in, or additions to, the edited manuscript will be accepted.

Electronic manuscripts

The publisher welcomes the receipt of an electronic version of your accepted manuscript. If there is not already a copy of this (on diskette) with the journal editor at the time the manuscript is being refereed, you will be asked to send a file with the text of the accepted manuscript directly to the publisher by e-mail or on diskette (allowed formats 3.5" or 5.25" MS-DOS, or 3.5" Macintosh) to the address given below. Please note that no deviations from the version accepted by the editor of the journal are permissible without prior and explicit approval by the editor. Such changes should be clearly indicated on an accompanying printout of the file.

Author benefits

No page charges. Publishing in Surface Science is free.

Free offprints. The corresponding author will receive 25 offprints free of charge. An offprint order form will be supplied by the publisher for ordering any additional paid offprints.

Discount. Contributors to Elsevier Science Journals are entitled to a 30% discount on all Elsevier Science books.
